

## Training Report

On

### The Topic" Assessment in Science

The wonderful session has been organised by CEO Noida conducted by Archana Singh. She told us about how the assessment should be done in Science subject as She started with an introduction part and that she asked what is the difference between testing, measurement, Assessment and evaluation.

Brainstorm list of all the assessment techniques you currently use in your workplace. People give their different views on that. She broccoli discuss about the previous techniques that we use for assessment and now we are using formative and summative assessment both.

Traditional dominant paradigm 1900's - 2000 Social efficiency curriculum. We teachers preference EQ rather than IQ. Behaviourist view of learning scientific measurements. Revised Bloom's taxonomy as well.

Also discussed Reform paradigm cognitive and constructivist views of learning. Discuss the point related to formative and summative assessment how when and where we have to use this assessment how the formative assessment useful for students throughout the session and summative assessment can be very useful at the end of the session.

Thank you. For giving me such an opportunity to attend this fruitful session.

Regards

Ms. Harshita Rajput
