Centre of Excellence, Dehradun has organized workshop on the theme” ICT Integration in teaching of English [IX-X]. ”. The main objective was to enhance and equipped the 21st century learners to use intelligibly all the available online tools. Ms SWAPNA NAIR [*PRINCIPAL*] laid emphasis to adopt multi level instruction in the process of teaching or concept to the class with varying outcomes.

ICT and its Definition:

ICT is generally defined as technology functioning to support the process of conveying information and communication. With the development of ICT ,the communicator and communicant can communicate through telephone, internet, email, satellite, television, video conference etc.

ICT NATURE AND FEATURES

- Speed and automatic function, which enable the task to be completed and repeated quickly.
- Capacity and range are vast and easy to access and handle for immediate information.
- Provisionality and interactivity enables rapid feedback and explored readily.
- Improves the quality of task outcome for the pupil, encourage reflection, facilitate differentiation and make higher level level of challenge feasible.

CHALLENGES

- Technical difficulties such as broken device, compatibility software etc.
- Problem that can create classroom management such as broken web or temporarily shutdown web.
- Limited access to certain sources like websites, online E-books.
- Ambiguity language instructions especially in written form.

ADVANTAGES:

- IT can be used to help improve their literary skills like reading and writing through write boards, web-based space, wikis and blogs.
- Podcast, Vodcast and Audio blog can be used that can help students in improving their listening comprehension skills.
- The information required will be more quickly and easily accessible for educational purposes.
- Progress of ICT will also allow the development of virtual classroom or classroom-based teleconference that does not require the educators and learners are in one room.
- Innovation in learning is growing in the process of e-learning innovations that further facilitate the educational process.

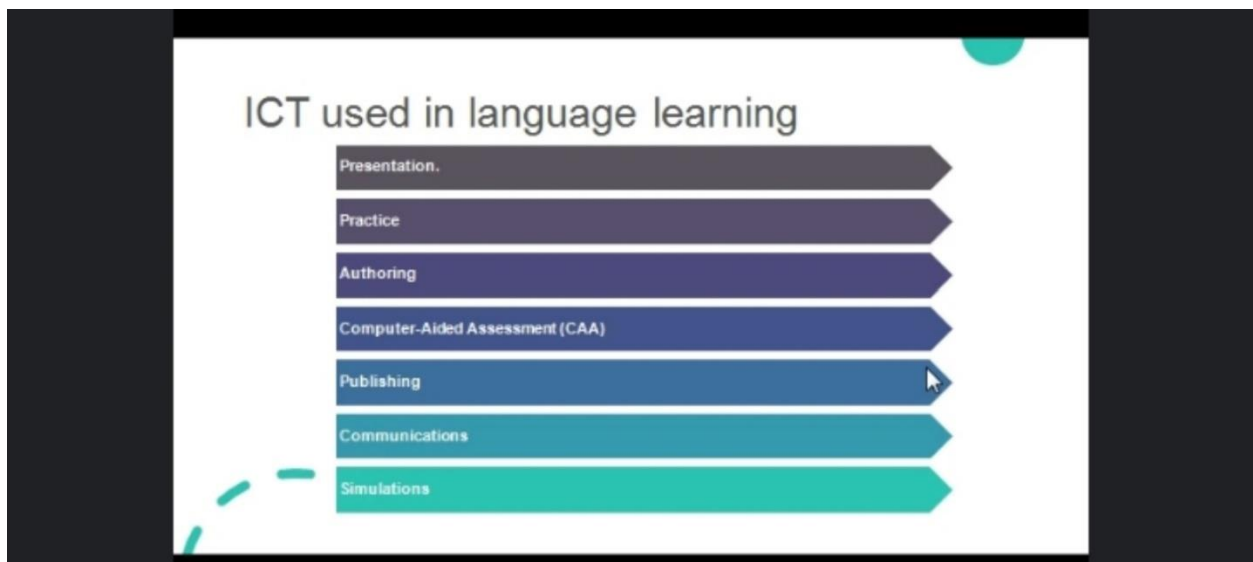

DISADVANTAGES:

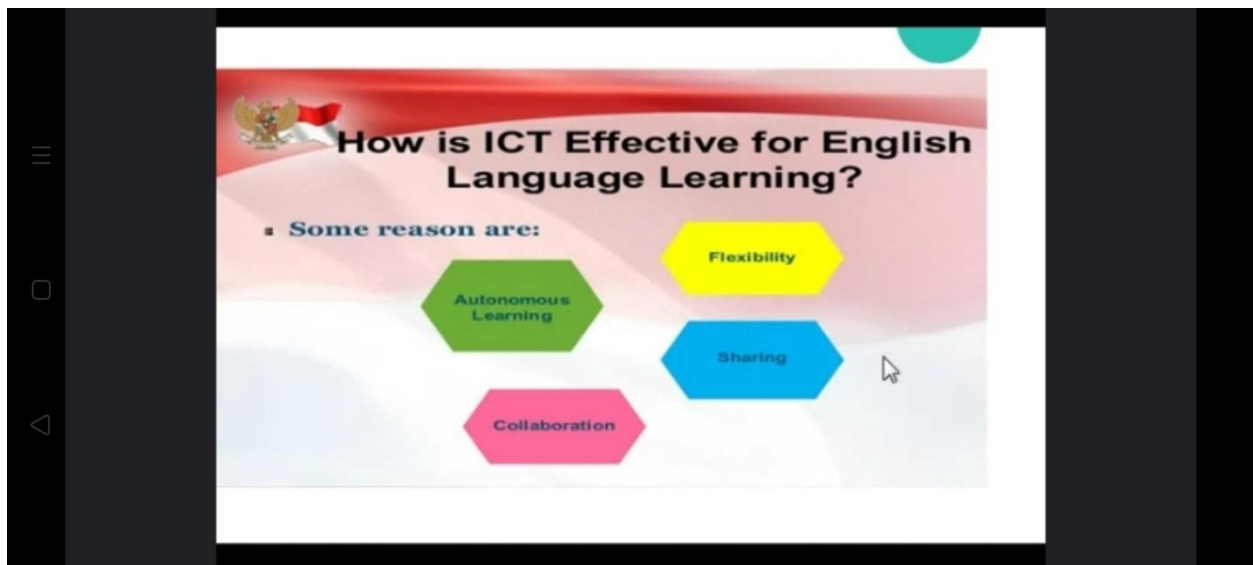

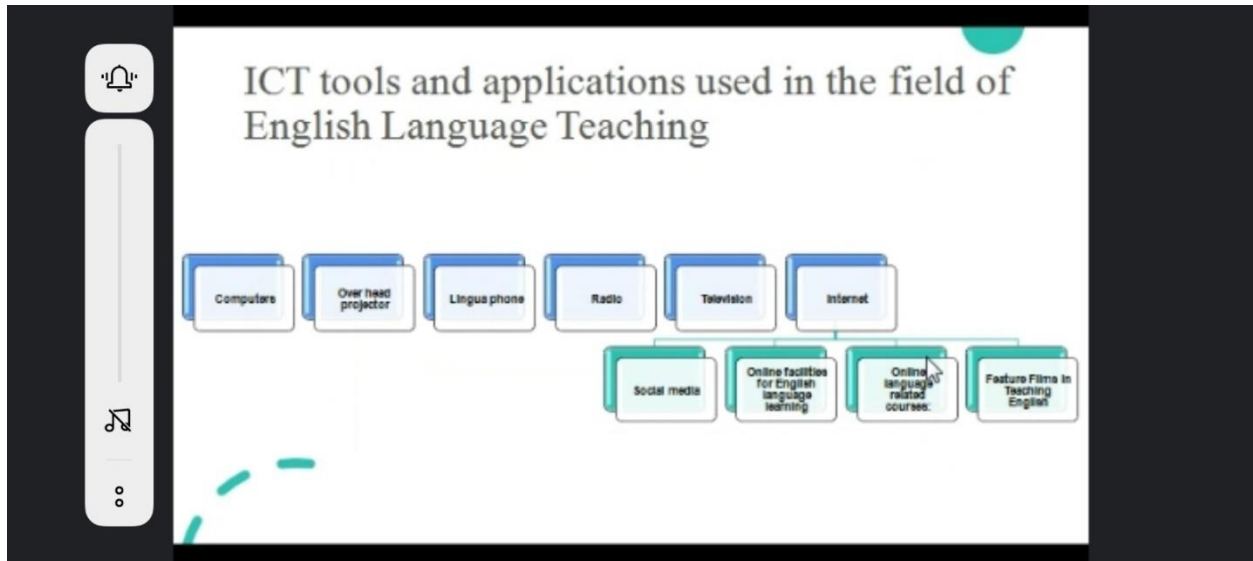

- Process of ICT will also occur of violation of Intellectual Property Rights for the easy access to the data that is causing people plagiarist will commit fraud.
- Television train the children to think short and survive concentrated in a short time.
- It is also responsible in killing the creativity of the child and limits their thought process.
-

TOOLS AND APPS TO EXPLORE:

Certain tools and apps have been recommended by the resource person like The Knotted lines, Wake let, Arts Edge. M S Sway, Make Beliefs etc. Some Virtual Classroom tools for English like Film English. Breaking News English, Go Noodle etc. can also be used in Classroom teaching.

Few Snapshots of the Webinar are:

It was highly enriching and informative session based on the effective use of IC tools in LRWS Skills in English language that enhances our child with advance technology skills which makes educational process more accessible.
