Topic : Value Education and its significance

Resource Person : Mr. Joginder Kumar

“ Value education is the process by which people give moral values to each other.” Value education aims at holistic development of the child while addressing the head and heart. It creating balance between child and community. An education that connects the heart , head and hand.

On 14-05-2021, I attended the workshop on the topic Value education and its significance which was very informative session .This informative session was taken up by **Mr. Joginder Kumar**. More than 450 teachers attended the workshop.

He explained us that values cannot be taught like a subject i.e. languages, history, science. These can only be inculcated through the situation deliberately planned while teaching various school subjects. Poems , stories, examples of great and noble persons , group discussion, debates, case studies, co – scholastic activities , games and sports are few examples for inculcating values.He explained various levels of Peace – individual level. Interpersonal level, community level, national level and global level.

The resource person who took the workshop was immensely experienced and professional. The interactions made sure that there was no low point in the session. It gave everyone a clear perspective for the long run. It was very informative and interactive and even quite fun filling session. I am very thankful to my school for giving me this wonderful opportunity to attend this webinar.
