Report presented by – Rajeev Tripathi

Digital learning means learning using electronic devices. As electronics, and more specifically digital learning platforms continue to grow in popularity, industry-leading platforms continue to evolve, paving the way for engaging, effective, and results-driven learning.

Why is digital learning useful ?

While traditional teaching methods involve a teacher imparting information to students and everyone has direct contact with each other, this is useful for traditional schools where pupils are in the same place at the same time and are seeking to be taught the same thing. As such it can be very efficient for a teacher to transfer knowledge to an entire class at once.

Digital learning at school

In volatile times when digital schooling is required, it is essential that your institution or organization is prepared to rely completely on technology. In the midst of the Corona virus pandemic, digital schooling has developed in recent weeks, placing ample emphasis on the digital learning environment.

How does technology enhance digital learning?

Digital education system are pivotal to counteracting the negative effects COVID-19 has had on our education system and normative ways of life. Digital education must be familiarised with for the ease of transition between traditional schooling and the intersect of technology.
