Webinar report on topic “ENVIRONMENTAL EDUCATION IN PRACTICE “organised by CBSE Delhi by resource person Dr. Sushil Dwivedi (EDUCATOR)focusses on following main points-

Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment. As a result, individuals develop a deeper understanding of environmental issues and have the skills to make informed and responsible decisions.

Benefits of Environmental Education:

- Imagination and enthusiasm are heightened
- Learning transcends the classroom
- Critical and creative thinking skills are enhanced
- Tolerance and understanding are supported
- State and national learning standards are met for multiple subjects

Environmental education:

There are also ways that environmental education is taught outside the traditional classroom. Aquariums, zoos, parks, and nature centres all have ways of teaching the public about the environment.

Benefits of Environmental Education:

- Promotes healthy lifestyle
- Instils respect for nature
- Teaches children about environmental challenges
- Trains on significance of being kind to nature
- Enables development of critical thinking skills
- Teaches them to be responsible
- Assists government meet its objectives

Some practical tips schools can adopt for Environmental Awareness:

- Introduce the 3 R's: reduce waste, reuse resources, and recycle materials.
- Organise tree planting days at school and tell them why trees are important to the environment.
- Encourage children to switch off all appliances and lights when not in use.

Environmental education is an essential part of every pupil's learning. It helps to encourage awareness of the environment, leading to informed concern for active participation in resolving environmental problems. Really, it was totally knowledgeable session.
