

## **Title: Educational Trip Report: Children's Visit to Tara Mandal Regional Science Center**

**Date: 30.10.23**

### **Introduction:**

Mont 1 and Mont 2 enthusiastic children embarked on an educational journey to the Tara Mandal Regional Science Center. This trip offered a fantastic opportunity for them to explore the wonders of the universe.

### **Visit Highlights:**

#### **1. Stargazing Experience:**

The children learnt about various forms of stars, such as Cancer, Leo, and Scorpio. They were guided through a fascinating exploration of the night sky.

#### **2. 3D Show of Aquatic Animals:**

At the science center they were immersed in a world of aquatic animals, including octopuses, sharks, seahorses, and starfish. Through the vivid 3D presentations, the children learned about the unique features and habitats of these creatures.

#### **3. Balancing Science Activity:**

An engaging science activity challenged the children to balance objects on their fingers. This hands-on experiment not only taught them about balance and gravity but also made science fun and interactive.

### **Conclusion:**

The visit to Tara Mandal Regional Science Center was a resounding success. The children not only expanded their knowledge of astronomy, constellations, and aquatic life but also had a great time doing so.
