

Imbibing wisdom from our rich Indian heritage.

India's ancient heritage is a treasure trove that spans science and culture, and includes Vedic philosophy, ayurveda, yoga, astronomy, architecture, the classical arts, and treatises on governance and the art of living. In the education we impart, we combine the distillation of this wisdom with the most advanced and futuristic knowledge from across the globe. Our schools collaborate with SPIC-MACAY to enrich our students with an appreciation of Indian art and culture. We also conduct exchange programmes with schools across the world, providing an opportunity to our students to appreciate other cultures.
